

Viruclear PLUS

PRODUCT INFORMATION

Ready-to-Use Surface Sanitiser

Viruclear PLUS is a powerful ready-to-use surface sanitiser that contains Hydrogen Peroxide for instant sanitising action and Quaternary Ammonium Compound for prolonged antimicrobial effect. Developed specifically for reducing the infectivity of coronaviruses, known to persist on surfaces such as metal, glass and plastic for up to 9 days. Suitable for use in commercial, industrial, health care and other public facilities.

DIRECTIONS

Spray n Wipe Application: Hard Surfaces

The use of gloves is highly recommended. Spray onto surface and allow 60 seconds of contact time for full sanitising action to take place. Wipe surface with clean cloth to remove any moisture and allow to air dry.

Pour Application: Hard surfaces

The use of gloves is highly recommended. With a clean cloth move the solution across the entire surface to be sanitised. Allow 60 seconds of contact time before removing excess water with a damp cloth.

Bulk Spray: Large Surface Areas

The use of PPE is highly recommended. Spray surfaces to be sanitised thoroughly with Viruclear Plus solution and allow to air dry. Thoroughly rinse sprayer after use.

Please note: Surfaces that show large amounts of gross soiling will need an initial pre-clean before a final sanitising step.

MPI APPROVED C43

ASUREQUALITY ASSESSMENT

Passed AsureQuality assessment for food/ beverage/ dairy factory for automatic dishwashing with residues drained & minimised e.g. safe rinsed & dried” H4441 with conditions.

MPI DAIRY APPROVAL

APPROVAL and RECOGNITION of Dairy Maintenance Compound.

Use within 12 months of manufacturing. Store in original container or suitable dispenser. When not in use, store in cool, dry, dark and ideally lockable location.

PROPERTIES

APPEARANCE	Clear, Colourless Liquid
FRAGRANCE	No fragrance
pH	4.50 (@100% soln)

REORDER

1Lt Applicator	BK-VIRUCP01
4Lt Applicator	BK-VIRUCP04
5Lt	FK-VIRUCP05
20Lt	FK-VIRUCP20
